ETFs give exposure to a variety of investment segments

- ETFs can provide investors exposure to various asset classes as per the defined methodology.
- They can cover a range of sector, strategy, style and size spectrums, enabling investors to build customized investment portfolios consistent with their financial needs, risk tolerance, and investment horizon.
- Both institutional and individual investors use ETFs to conveniently, efficiently, and cost effectively allocate their assets.

It is always advisable to consult your financial advisor before investing.

All Mutual Fund investors have to go through a one-time KYC (Know Your Customer) process. Investors should deal only with Registered Mutual Funds (RMFs). For further information on KYC, RMFs and procedure to lodge a complaint in case of any grievance, you may refer the Knowledge Center section available on the website of Mirae Asset Mutual Fund.
